

## Late Analysis - Nov 2016

As you can see from the table below the amount of learning time that has been lost just in October is a shocking **697** which equates to just over **11 AND HALF HOURS**. With **Year 1 being the most with 311 minutes lost**.

Children who are late into school start without having the opportunity to have a relaxed start to the day. When they are late they are catching up so start at a disadvantage.

**ALL CHILDREN SHOULD BE IN SCHOOL READY TO START THE DAY BY 8:50 EVERY MORNING.** We will continue to monitor this and look forward to seeing an improvement during this next half term.
