

## Elson Infant School Curriculum Intent

Broaden children's understanding of the importance of learning about **different cultures, communities, religions and traditions** that make our world so exciting and unique

**Celebrate their own locality**, which will build their **social, moral, spiritual and cultural compass** before comparing it to

Develop an understanding of human and physical features of significant places in our world and the natural changes that occur as well as **understanding the impact that they have** in protecting these features.

Our Geography enables our children to **SHINE** by...

Teach our young geographers to be understanding and respectful of the differences that each culture and religion celebrate

Inspire children to develop a **curiosity and fascination** for the world and its people (including their place in it)

Learning takes place **outdoors**, allowing children to begin to develop a fascination and **inquisitive attitude** towards geography

In the Early Years Foundation Stage, children are supported in beginning their understanding of the world by **exploring** the environment around them, both natural and man-made.
